

Gondwana Research

INTERNATIONAL GEOSCIENCE JOURNAL

ISSN: 1342-937X

(Indexed in Science Citation Index-Expanded, ISI Alerting Service, Current Contents and Georef
and abstracted in Chemical Abstracts and Mineralogical Abstracts)

VOLUME 6, NO. 3

CONTENTS

JULY 2003

Special Issue in Honour of Prof. John J.W. Rogers on Supercontinents and Crustal Evolution (Special Issue Editor: M. Santosh)

Supercontinents and crustal evolution: introduction <i>M. Santosh</i>	351
John Rogers: an autobiographic sketch <i>John J.W. Rogers</i>	353
Supercontinents in earth history <i>John J.W. Rogers and M. Santosh</i>	357
Gondwana Alive Corridors: extending Gondwana Research to incorporate stemming the Sixth Extinction <i>M.J.de Wit and J.M. Anderson</i>	369
Vestiges of the Mesoproterozoic events in the Neoproterozoic Mozambique Belt: the East African perspective in the Rodinia puzzle <i>Sospeter Muhongo, Christoph Hauzenberger and Holger Sommer</i>	409
Assembly, accretion and breakup of the Paleo-Mesoproterozoic Columbia supercontinent: records in the North China craton <i>Guochun Zhao, Min Sun, Simon A. Wilde and Sanzhong Li</i>	417
Consolidation of continental crust in late Archean–early Proterozoic times: a paleomagnetic test <i>J.D.A. Piper</i>	435
Late Mesoproterozoic arc and back-arc volcanism in the Heimefrontfjella (East Antarctica) and implications for the paleogeography at the southeastern margin of the Kaapvaal-Grunchogna craton <i>W. Bauer, J. Jacobs, C.M. Fanning and R. Schmidt</i>	449
India-Madagascar separation: breakup along a pre-existing mobile belt and chipping of the craton <i>U. Raval and K. Veeraswamy</i>	467
Geological and geophysical manifestations of the reunion plume-Indian lithosphere interactions – evidence from northwest India <i>A.B. Roy</i>	487
A plausible model for evolution of schist belts and granite plutons of Dharwar craton, India and Madagascar during 3.0–2.5 Ga: insight from gravity modeling constrained in part from seismic studies <i>D.C. Mishra and S.K. Prajapati</i>	501
C-, O-isotope and whole-rock geochemistry of Proterozoic Jahazpur carbonates, NW Indian craton <i>M.K. Pandit, A.N. Sial, G. Malhotra, L.S. Shekhawat and V.P. Ferreira</i>	513
The Bi'r Umq-Nakasib suture zone in the Arabian-Nubian shield: a key to understanding crustal growth in the East African orogen <i>P.R. Johnson, M.G. Abdelsalam and R.J. Stern</i>	523
Epigenetic nature of the BIF-hosted gold mineralization at Ajjanahalli, southern India: evidence from ore petrography and fluid inclusion studies <i>Nabarun Pal and Biswajit Mishra</i>	531
Petrology of a subduction-related caldera and post-collisional, extension-related volcanic cones from the early Cambrian and Middle Ordovician (?) of the Camaquã basin, southern Brazil <i>D. del P.M. Almeida, M.A.F. Hansen, H.C. Fensterseifer, K. Petry and L. de Lima</i>	541
