

Gondwana Research

INTERNATIONAL GEOSCIENCE JOURNAL

ISSN: 1342-937X

(Indexed in Science Citation Index-Expanded, ISI Alerting Service, Current Contents, Georef and Zoological Record and abstracted in Chemical Abstracts and Mineralogical Abstracts)

VOLUME 8, NO. 3

CONTENTS

JULY 2005

The Paranapanema Lithosphere Block: its importance for Proterozoic (Rodinia, Gondwana) supercontinent theories <i>M.S.M. Mantovani and B.B. Brito Neves</i>	303
Structure, composition and evolution of the South Indian and Sri Lankan granulite terrains from deep seismic profiling and other geophysical and geological investigations: a LEGENDS initiative <i>Alfred Kröner and Larry Brown</i>	317
Cambro-Ordovician magmatism in SE Brazil: U-Pb and Rb-Sr ages, combined with Sr and Nd isotopic data of charnockitic rocks from the Varzea Alegre Complex <i>Julio Cezar Mendes, Silvia Regina de Medeiros, Ian McReath and Cristina Maria Pinheiro de Campos</i>	337
Petrogenesis of A-type granitoids from the Alto Moxoto and Alto Pajeu Terranes of the Borborema Province, NE Brazil: constraints from geochemistry and isotopic composition <i>Ignez P. Guimarães, Adejardo F. Da Silva Filho, Silvana C. Melo and Moacir B. Macambira</i>	347
From alluvial fan to playa: an Upper Jurassic ephemeral fluvial system, Neuquén Basin, Argentina <i>Luis A. Spalletti and Ferrán Colombo Piñol</i>	363
Amphibole $^{40}\text{Ar}/^{39}\text{Ar}$ geochronology from the Okcheon Metamorphic Belt, South Korea and its tectonic implications <i>Sung Won Kim</i>	385
Alkaline magmatism versus collision tectonics in the Eastern Ghats Belt, India: constraints from structural studies in the Koraput Complex <i>Saibal Gupta, Jagatbikas Nanda, Sumit Kumar Mukherjee and Manasij Santra</i>	403
Geochemistry and origin of Neoproterozoic granitoids of Meghalaya, Northeast India: implications for linkage with amalgamation of Gondwana supercontinent <i>Subhasish Ghosh, A.E. Fallick, D.K. Paul and P.J. Potts</i>	421
Deformation style of slickenlines on mélangé foliations and change in deformation mechanisms along subduction interface: example from the Cretaceous Shimanto Belt, Shikoku, Japan <i>T. Shibata and Y. Hashimoto</i>	433
